ARTIFICIAL INTELLIGENCE

We could run out of data to train AI language programs

Researchers may have to get creative to make training data stretch further.

INTERNATIONAL DATA SPACES ASSOCIATION

10 principles of trusted data sharing in data spaces

+

ISO/IEC CD 20151
Dataspaces concepts and characteristics

+

Dataspace Protocol

1. **Dataspaces enable Trusted Data Sharing**
   "Dataspaces are a mechanism of trust"
2. **You shall have full autonomy in deciding with whom you share data with and under what conditions**
   "Your data, your choice"
3. **You shall be responsible for ensuring that you are free to act and can act autonomously**
   "With great responsibility comes great power"
4. **All participants shall be treated equitably in their rights and obligations**
   Dataspaces are decentralized & neutral
5. **Data Sharing is executed on separate peer-to-peer channels**
   "Data does not flow through the Dataspace"
6. **Dataspaces shall be based on open standards**
   "unity in standards, freedom in implementation"
7. **Dataspaces shall be infrastructure agnostic**
   "there is no single platform to rule them all"
8. **Dataspaces are building blocks for Data Ecosystems**
   "Dataspaces are not data ecosystems"
9. **Dataspaces shall be business model agnostic**
   "the opportunity is boundless"
10. **You shall honor your data contracts and its associated policies and verify adherence by others**
    "act in good faith, but verify"

Exclusive: US orders diplomats to fight data sovereignty initiatives

By **Raphael Satter** and **Alexandra Alper**

2026: A milestone year for data spaces – join us!

INTERNATIONAL DATA SPACES ASSOCIATION

10 years

Highly anticipated:
The new modular IDS-RAM

Low-cost, low-effort onboarding:
Connector as a Service

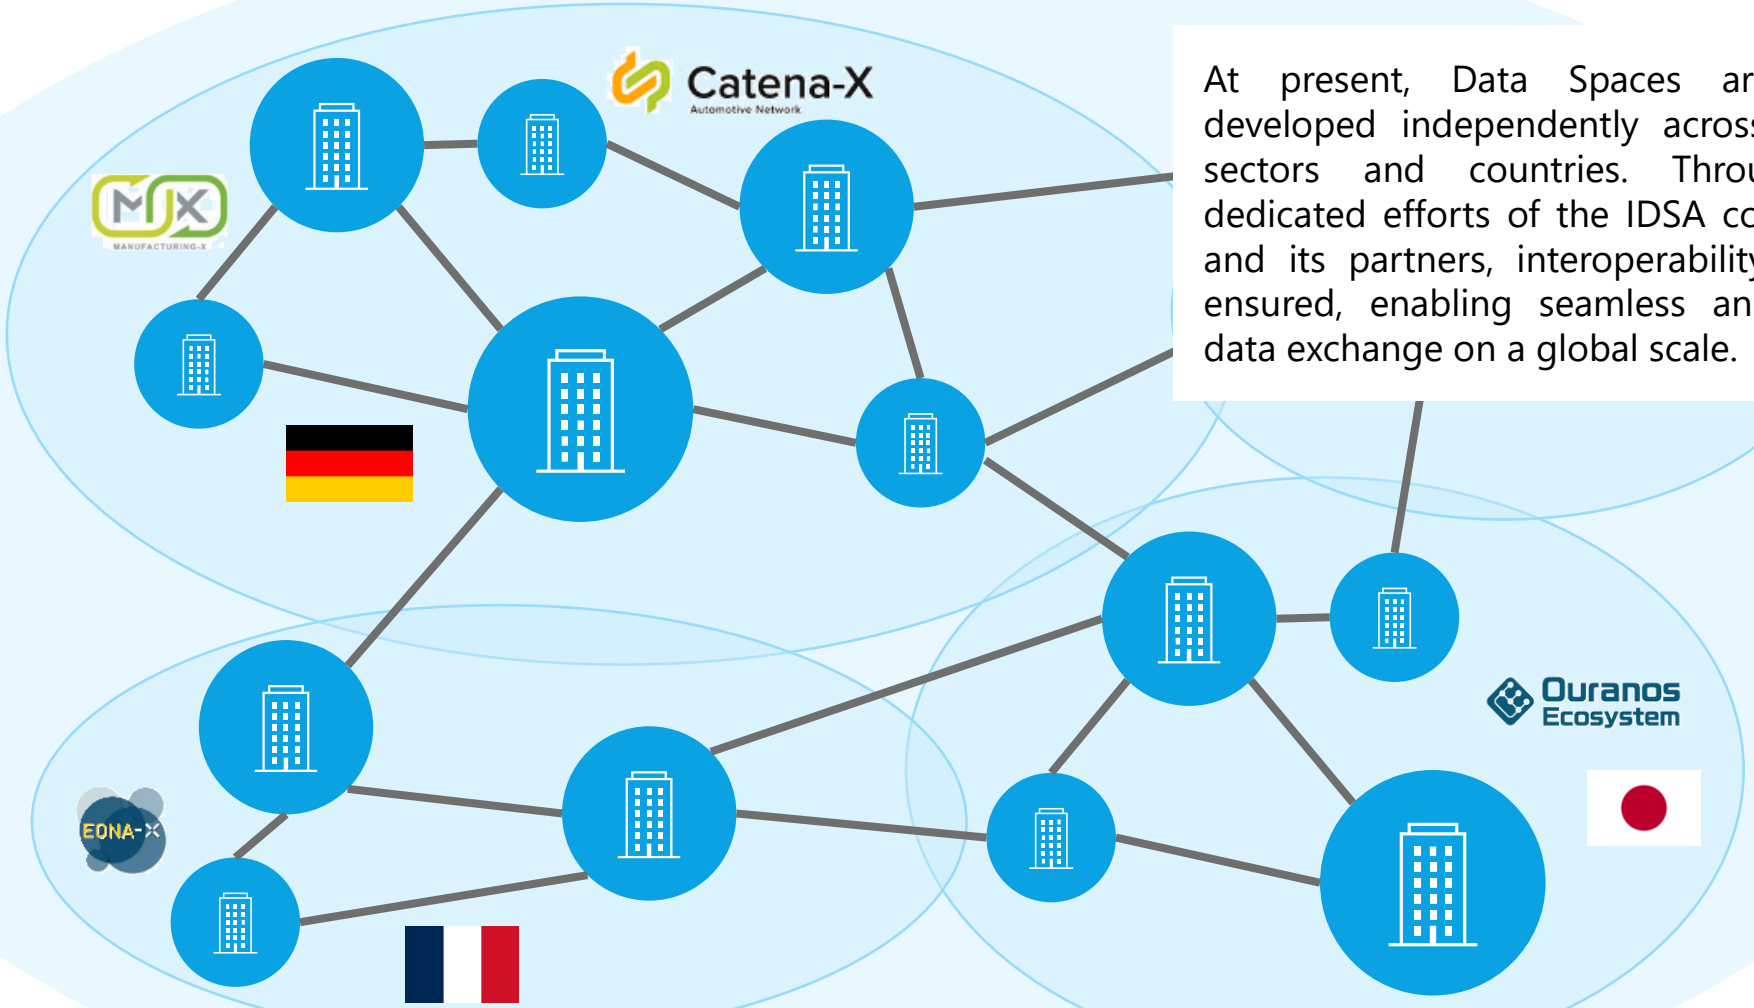
Concepts, principles, architecture: data space standard **finally an ISO norm**

Future-ready: **Updated IDSA Rulebook** defines governance, operations, legal aspects

All year long: IDSA celebrates **10 years of data space pioneering** and a **future where data spaces drive impact and innovation**

The future of data spaces

INTERNATIONAL DATA SPACES ASSOCIATION



At present, Data Spaces are being developed independently across various sectors and countries. Through the dedicated efforts of the IDSA community and its partners, interoperability will be ensured, enabling seamless and secure data exchange on a global scale.

Let’s continue meet at Hannover Messe!

INTERNATIONAL DATA SPACES ASSOCIATION

Industrial data spaces in action

Simple, scalable, profitable

» Join our **event in the CC, room 18 | April 21, 1pm**

» Meet us at Plattform Industrie 4.0, **hall 13, C24**

» Talk to us at OPC booth, **hall 27, F60**

HANNOVER MESSE

Choose your path to success

Subscription or membership—Choose what best fits to your needs

INTERNATIONAL DATA SPACES ASSOCIATION

Subscribe to the User Group

*Best suited for **data space users** looking for business opportunities, best practices and resources to make the most of participating in data spaces*

Includes access to the User Group only

Become an IDSA Member

*Ideal for **data space makers** focused on building data spaces and offering products and services*

Full access to all of the Association's activities, including the User Group's
