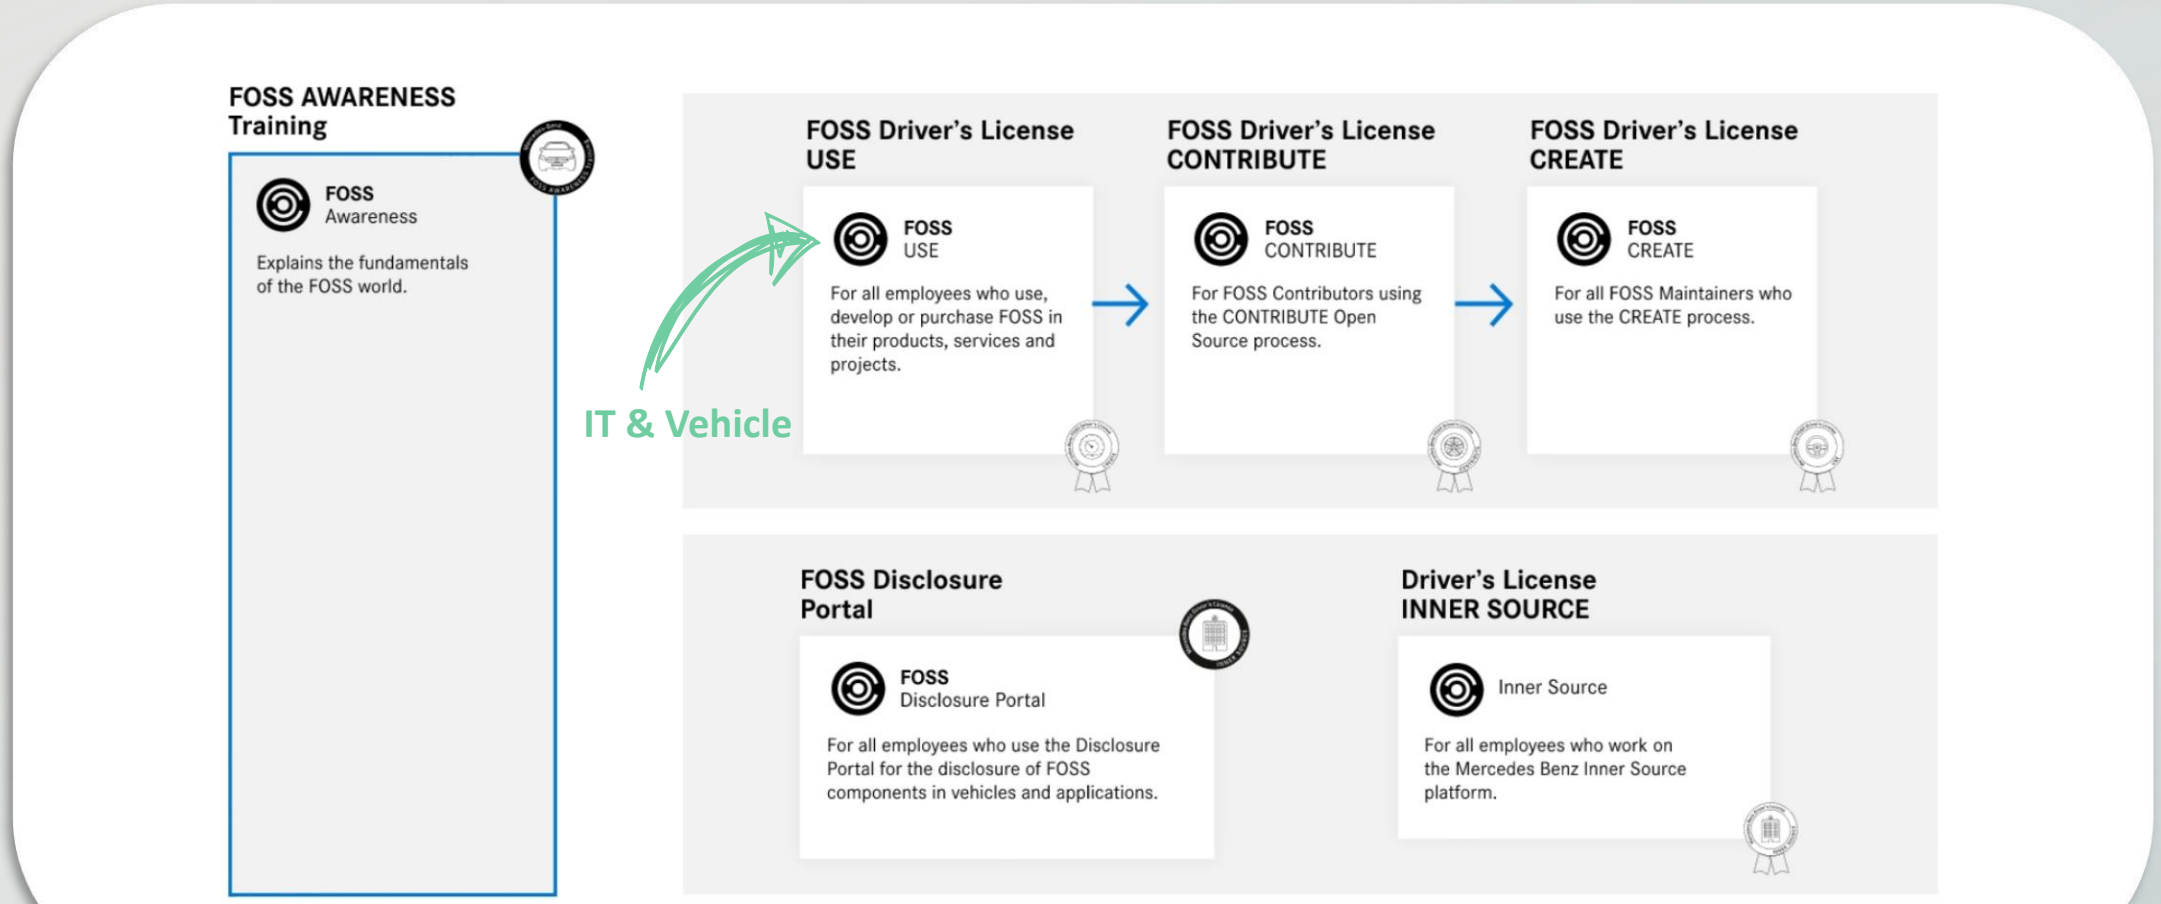
FOSS TRAININGS @ MERCEDES-BENZ

Anna Maria Ewerlin

Our Learning Journey



Some facts

Target Group	▪ All Mercedes-Benz employees worldwide ▪ Example: over 32.000 successful completions for FOSS Awareness training ▪ Developed with internal / external Agencies, hosted on internal Learning Management System
Roles	▪ Developer / Architects … ▪ Control Unit Responsible / Product Owner ▪ Procurement ▪ FOSS Stakeholder (e.g. FOSS Office, FOSS Coordinator)
Content	▪ Different processes: Vehicle / IT ▪ Governance / technical content
Stakeholder	▪ Research and Development (Vehicle) ▪ Enterprise IT ▪ Legal

Our Key Learnings

1. Comparing internal and external training development
   - Costs
   - Updates
   - Access of development platform

First and second wave with external agency, third wave with internal supplier, fourth wave completely developed by ourselves based on authoring tool

2. Varied expectations among stakeholders and target groups
   - Governance training
   - Tool training
   - Learning experience / tracking

Extract specific tool information and details into learning nuggets, articles, special trainings
Separate learning paths
Define common goal clearly in the beginning

3. Continuous updates
   - Keep it simple vs specific details

Abbreviations? Links? Name of tools? … Make it maintainable!

Thank you
