About Me

Zentrum Digitale Souveränität

PRESENTER

Julian Schauder

Development Lead @ ZenDiS GmbH

> *"IT is a public good."*

About ZenDiS

Zentrum Digitale Souveränität

> *"Technological self-determination is the foundation of a digitally sovereign state. Against the backdrop of the current geopolitical situation, promoting open-source software and strengthening digital sovereignty is more important than ever. ZenDiS ensures that the public sector remains capable of acting in this area. - Dr. Markus Richter State Secretary"*

2024	40+	100%

VISION

A state acting effectively in the digital world

MISSION

Enabling reduction of critical dependencies

Zentrum Digitale Souveränität

Sovereignty in a nutshell

The ability to control (digital) fate according to available resources.

Rights of use

licenses can be revoked or change requirements

Politics

(foreign) policy may request to break confidentiality or service

Ecosystem

sustainable long-term solutions profit from ecosystems which require reliable platforms

Zentrum Digitale Souveränität

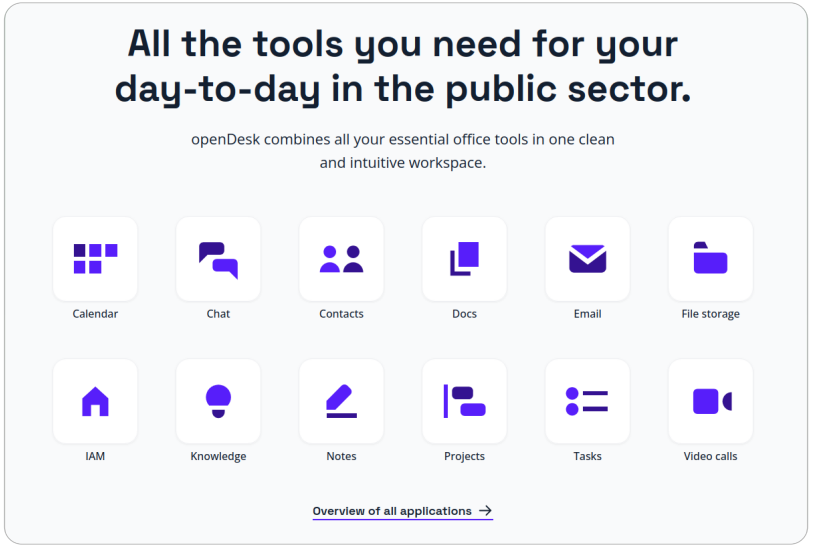
Our Stack

openDesk

openDesk

Zentrum Digitale Souveränität

- → Collaboration Suite
- → SaaS & On-Premises
- → Integrates popular OSS-Tools
- → Modular by design
- → Cloud (K8s) by design
- → Currently 150k licenses active.
- → Visit: https://opendesk.eu



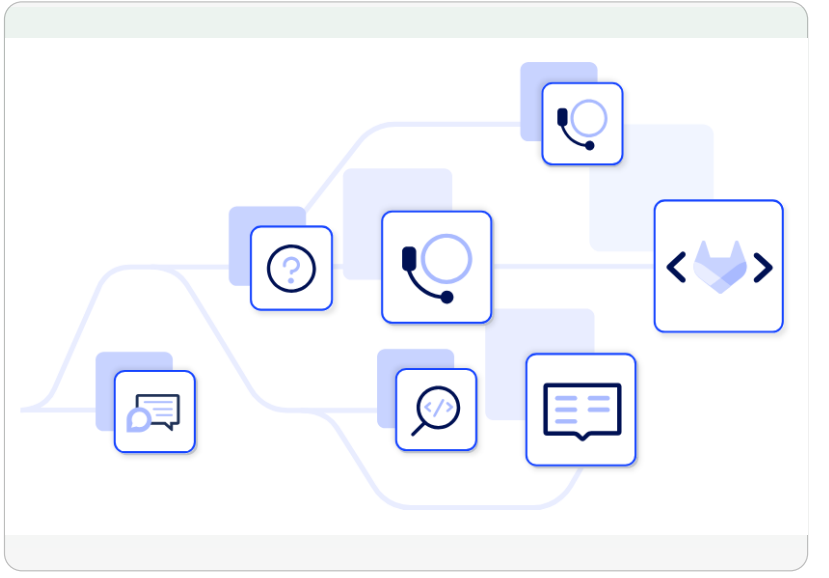
Our Stack

openCode

openCode

Zentrum Digitale Souveränität

- → Shared (Collaboration) Infrastructure
- → OSS-Policy
- → OSS-Guides
- → Security-Tooling
- → Software Catalogues
- → More than 10k Users
- → More than 3.000 projects
- → Visit: https://opencode.de



Zentrum Digitale Souveränität

Our Stack

Secure Government Container Initiative

Zentrum Digitale Souveränität

- → First step of broader SSDLC-Strategy
  - → Visit: https://opencode.de/de/ssdlc
- → Source for Container Images
- → Attestation-First
- → CycloneDX + VEX
- → Free reference Toolchain
- → Collaboration between Public-Administration and Private Sector
- → Visit: https://container.gov.de

Summary

openCode

providing open source infrastructure to collaborate on software and build ecosystems

SGCI

providing geopolitically resilient supplychains to enable national cloud strategies

openDesk

providing a geopolitically resilient platform for digital processes and process ecosystems

FIN

Zen DiS Zentrum Digitale Souveränität

> *"Secure software supply chains are a crucial factor for successful digitalization. They make dependencies visible and therefore manageable."*

Claudia Plattner, President of the BSI about the SSDLC strategy
